

Entour Haze Pro

Code: 1411100028

Part of the expanding ADJ Entour Series of atmospheric machines, the Entour Haze Pro is a touring-grade haze machine built into a durable flight case. It requires no warm-up time and, with an air pressure of 101psi, is able to generate an impressive output of 3,000 cubic ft. per minute. This allows large stages and venues to be easily and quickly filled with lightshow-enhancing haze whenever it is required. The machine uses oil-based haze liquid only and has a fluid tank capacity of 2.5 Liters. It has an extremely efficient fluid consumption rate of 15 hours continuous output per Liter, which means that 37.5 hours of haze can be generated from a single tank of fluid.

This professional-caliber haze generator features an easy to read LED function display, with in-built timer, which allows continuous, intermittent or manually-triggered hazing. It features a Locking Power mains input socket and is fitted with both 3-pin and 5-pin XLR sockets allowing DMX control with a choice of 1-, 2-, and 4-channel modes. Measuring 20.75" x 15" x 15" / 530 x 380 x 380mm (LxWxH) and weighing in at 70 lbs. / 31 kg, the unit is fitted with heavy-duty handles on either side which make it easy to lift, carry and position the machine.

The Entour Haze Pro is designed for large stages and venues and for outdoor applications where the oil based haze will sit longer in the air.

Features:

- Professional Mobile DMX Haze Machine
- For use with oil based Haze Liquid only (Code 1421200026 ADJ Haze Fluid oil based 5l)
- No Warm-up time necessary
- Air Pressure: 101 psi
- Output: 3,000 cubic ft. per min
- Fluid Consumption Rate: 15 Hours continuous work / per Liter

Control:

- 4 operational Modes : Manual Mode, Timer Mode, Continuous Haze Mode and DMX Mode
- 3 DMX Channel Modes; 1, 2 or 4 channels
- LCD Function Display with built-in remote with Timer, Continuous Hazing & Manual Hazing

Construction:

- Metal Housing built in Flight Case
- Built-In non removable fluid tank: 2.5 Liter

Electrical:

- Multi-voltage operation: AC 120-240V, 50/60Hz
- Power Consumption: 420W (Min) 660W (Max)

Connections:

- 3 & 5-pin Locking DMX In/Out connections
- Locking Power IN connection

Dimensions / Weight:

- Dimensions (LxWxH): 530 x 380 x 380mm
- Weight: 31 kg.
