Firmware Update Radius 3000

Before you update Firmware of Radius 3000, please check which version of Firmware you use:

(Manual, page 17 ff. > http://www.americandj.eu/media/media/manuals/Radius%203000.pdf <)

The current version of Firmware is:

> CON11.01 ; SEV08.03 ; BUF 07.01 ; DSP 22.07 <

If you use an older version of Firmware , you have to update!

This update will also include the pitch accuracy upgrade!

If you have questions regarding the update, please contact us > service@adjgroup.eu <.

How to do the firmware update:

1. Please find the latest firmware attached, please unpack the RAR file onto an empty standard USB stick. Please make sure that you extract it to root directory of USB-Stick!

2. On the USB stick must only be the 5 files.

3. Connect the USB stick to the Radius 3000 to update the units.

4. Don't remove the USB stick while updating, also don't power OFF the units. This will damage your Radius 3000 permanently.

5. The update procedure is on your own risk and warranty will be void.

Enjoy your American Audio Radius 3000!
